EDUCATION

Chartered Financial Analyst (CFA®) Program, CFA Institute — Passed Levels I and II **Level III Candidate**
University of California San Diego — B.S. Data Science **Jun 2026**

- **Major GPA: 3.8 / 4.0**; Cumulative GPA: 3.7 / 4.0
- **Awards:** Rady Advanced Fundamental Equity Valuation Tournament, HDSI Best Visualization Project
- **Coursework:** Financial Mathematics, Time-Series Analysis, Probabilistic Modeling, Representation Learning

PROJECT EXPERIENCE

Senior Capstone: Credit Risk (industry partner Prism Data) **Sep 2025 – Mar 2026**

- Scored the financial health of loan applicants from the transaction data in their bank statements
- Built an AI model from scratch that sorts bank-statement transactions into spending categories with 95% accuracy
- Created a credit-risk model that ranks risky vs. safe loan applicants 10% better than the FICO credit score
- Built local AI agents to test new risk-signal ideas, halving manual analysis hours while keeping client data private

Cross Market Lag Research (open source) **May 2026**

- Tested a Quantitative Trading Strategy: is there a latent lag between two correlated markets in different time zones?
- Built a data and backtesting pipeline covering 13 global markets, 156 market pairs and 588 lead-lag tests
- Found 60 statistically significant market pairs, then put them through rigorous tests to avoid overfitting

Shorelife (California Water Quality Forecast System) **Apr 2026 – Present**

- Built a data pipeline that combines state water samples, county advisories, rainfall, river flow and UV readings
- The forecast correctly flags 81% of unsafe beach days, a 30% improvement over previous studies
- Launched an iOS app that forecasts bacteria risk at California beaches, refreshed automatically every day

On-Device AI iPhone App **Jun 2026 – Present**

- Shipped XOXO: Hru, the first App Store app built on Apple's on-device image AI, synced through iCloud
- Generated 1,500 test images to tune AI prompts, picking a design that showed mood changes 70% more clearly
- Built Goldilocks, a group-planning chat with Apple's on-device AI where all user data stays private and encrypted

WORK EXPERIENCE

HanKyul Inc., *Korea* – Intern **Jun 2025 – Sep 2025**

- Led AI adoption for a team of 20 non-technical employees, coaching them on prompt engineering
- Turned recurring office tasks into step-by-step AI workflows that colleagues could run without technical help

UC San Diego – Research Assistant **Jun 2024 – Feb 2025**

- Built machine-learning models with PhD researchers across domains, from particle physics to astrophysics
- Applied compute-efficiency principles to run parallel tasks on supercomputing resources, cutting man-hours 20%

HanKyul Inc., *Korea* – Intern **Jun 2024 – Sep 2024**

- Cleaned and deduplicated 10K+ database records, adding validation checks that flag missing or invalid fields
- Automated recurring manual data entry with Python scripts, cutting daily database updates from hours to minutes

Army, Republic of Korea – Sergeant **Feb 2021 – Aug 2022**

- Commanded a unit of 25+, overseeing artillery and coordinating with first responders during the Covid-19 pandemic

SKILLS

- **Finance:** Financial Statement Analysis, Fixed Income Analysis, Derivatives, Alternative Investments, Equity Valuation
- **AI and LLMs:** prompt engineering, LLM evaluation, multi-agent LLM workflows, on-device LLMs, AI adoption training
- **Statistics and ML:** forecasting, time-series, hypothesis testing, neural networks, XGBoost, PyTorch, scikit-learn
- **Data and programming:** Python, SQL, R, AWS, Cloudflare, pandas, Excel, Tableau, Java, HTML, JavaScript, D3, Swift
- **AI coding tools:** Claude Code, Cursor, Gemini, ChatGPT (Codex)
- **Languages:** Korean, English, Mandarin Chinese
