EDUCATION

University of California San Diego [Data Science, Bachelor of Science] Jun 2026

- **Major GPA: 3.8 / 4.0;** Cumulative GPA: 3.7 / 4.0
- **Coursework:** Time-Series Analysis, Probabilistic Modeling, Representation Learning, Financial Mathematics
- **Awards:** HDSI Best Visualization Project, Rady Advanced Fundamental Equity Valuation Tournament

Chartered Financial Analyst Exam, CFA[®] Institute Exp Level 3 Aug 2026

WORK EXPERIENCE

Prism Data, San Diego California – Data Science Extern Sep 2025 – Mar 2026

- Built a transformer model to categorize bank statement information achieved 95% in accuracy and F1 score
- Engineered XGboost model to score loan applicants based on bank transaction with 86% in a performance metric
- Created a local agentic workflow in feature engineering; enhancing data privacy while cutting man-hour by 30%
- Enhancing traditional credit score based loan workflow by identifying 15% more reliable loan applicants

UCSD, San Diego California – Research Assistant Jun 2024 – Feb 2025

- Developed a transformer model to classify events from modular neutrino detector increasing efficiency by 10%
- Worked with FPGA development, gaining foundational exposure to hardware design and verification concepts

Army, Republic of Korea – Sergeant Feb 2021 – Aug 2022

- Commanded a unit of 25+; oversaw artillery and coordinated with first responders during the Covid-19 pandemic

PROJECT EXPERIENCE

Mobile Application [Shorelife: California Beach Health Forecasting] Apr 2026 – Present

- Developed a platform forecasting daily bacteria risk for 90% of California beaches for surfers and swimmers
- Built robust ETL pipelines integrating marine microbiology, hydrology, and weather data into a data warehouse
- Deployed a FastAPI service powering a web platform and a mobile application that is attracting 30+ daily users

AI Research [Time-Series in Baduk] May 2026 – Jun 2026

- Conducted time-series modeling on board game dynamics; Linearized AlphaGo model to 5-variable expression
- Designed an innovative multi-agent LLM workflow based on the core concepts to bypass standard AI layers
- Achieved 80%+ flaw detection rate and eliminated model capitulation to user authority in methodology review

Cross Market Lag Research May 2026 – May 2026

- Developed quantitative equity research covering 10 years of data across 180 global market indexes
- Identified 50+ significant correlations by analyzing lagged response signals across international market proxies
- Executed anomaly detection protocols with a robust assessment with 10 rounds of multi-stage permutation

Data Visualization Project [Major League Baseball] Apr 2025 – Jun 2025

- Conducted end-to-end analysis of data to quantify and visualize complex outcome of the 100+ MLB batters
- Built a website with interactive a 3D model to present the complex findings to 30+ non-technical audience
- Demonstrated a visual example that hitters expand their swing zones by 35% as the strike count increases

SKILLS & INTERESTS

- **Technical Skills:** Python, SQL, Excel, PyTorch, JavaScript (D3, HTML, CSS), R, Stata, AWS, Tableau, Power BI
- **Methods:** Machine Learning, NLP, Time Series, Financial Modeling, Agentic Workflow, Prompt Engineering
- **Core Competencies:** Data Science, Statistical Analysis, Data Visualization, Quantitative Analysis, Econometrics
- **Language:** Korean, English, Chinese(Mandarin)

CLUB ACTIVITIES

Rotary – Rotaractor Apr 2023 – Jun 2026

- Community service club: feed San Diego, first Saturday homeless outreach, Sharia's closet, beach clean-up, etc.
